EMBEDDED ACCESS CONTROL - OUTDOOR

Features

Mini size

IP 66

Metal Case

Card

Fingerprint

PRODUCT DESCRIPTION

The Q-A64 is an embedded metal access controller designed for secure and reliable entry management. With an IP66 waterproof rating, this controller is built to withstand harsh outdoor environments. It supports up to 1000 users, including 100 fingerprint users, 890 EM card/PIN users, and 10 visitor users. The device is equipped with Wiegand 26-bit and 34-bit output, offering compatibility with various access control systems.

PRODUCT ADVANTAGES

- **Rugged Design:** Embedded metal construction with IP66 waterproof rating, ensuring durability and reliability in outdoor settings.
- **Versatile User Support:** Accommodates up to 1000 users with a mix of fingerprint, EM card, PIN, and visitor access options, providing flexibility in user management.
- **Wide Compatibility:** Supports Wiegand 26-bit and 34-bit output, making it compatible with a wide range of access control systems.
- **Enhanced Security:** Offers both card/PIN and fingerprint access options, ensuring a high level of security for sensitive areas.
