PRODUCT DESCRIPTION

The Q-K14DL is a stainless steel ANSI American size door release exit push button, designed for use in access control systems. This button features an LED light for visual indication, ensuring clear status monitoring. Constructed from high-quality stainless steel with a panel thickness of 1.7mm, the button is built for durability and long-term performance. It supports multiple output contacts, including Normally Open (NO), Normally Closed (NC), and Common (COM), making it suitable for various door release applications.

PRODUCT ADVANTAGES

ANSI American Size: Designed to meet ANSI American size standards, ensuring compatibility with a wide range of installations.

LED Visual Indicator: Equipped with an LED light, providing clear visual feedback on the button's status.

Durable Construction: Made from high-grade stainless steel, offering resistance to wear and corrosion, ensuring long-lasting use.

Flexible Output Options: Supports NO, NC, and COM output contacts, facilitating easy integration with various access control systems.

Reliable Performance: Engineered for consistent operation, making it a reliable choice for secure door release applications.
