

DUAL FREQUENCY SMART CARD MIFARE+ UHF

PRODUCT DESCRIPTION

The Q-EM+UHF is a dual-frequency smart card that combines EM (125 kHz) and UHF technologies. This card is designed for environments that require multi-frequency compatibility, offering both close-range (EM) and long-range (UHF) capabilities. It is ideal for applications such as access control, identification, and vehicle management where different frequencies are required for secure and flexible operation.

PRODUCT ADVANTAGES

- **Multi-Frequency Support:** Combines the secure, high-frequency Mifare 1K technology with the extended range of UHF, offering versatile applications.
- **Enhanced Security:** The Mifare 1K provides robust security features, while UHF adds long-range identification capabilities.
- **Versatile Use:** Suitable for use in environments that require both close-range secure access and long-range identification, such as corporate offices, warehouses, and industrial sites.
- **Durable Design:** Built to withstand frequent use, ensuring long-term reliability in demanding settings.

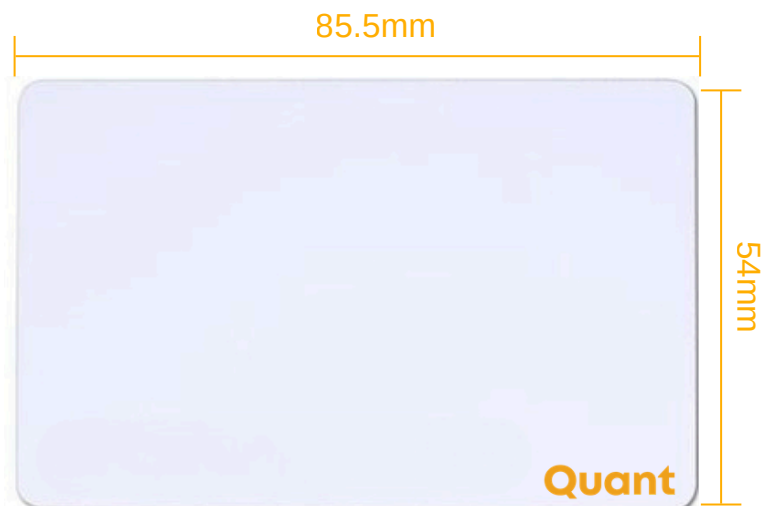

Q-MF1+UHF

TECHNICAL SPECIFICATIONS

Parameter	Specification
Model	Q-MF1+UHF
Frequency	Mifare: 13.56 MHz + UHF: Long-range UHF technology
Card Type	Dual Frequency Smart Card
Dimensions	85.5 x 54 x 0.86mm
Warranty	Lifetime
Country of Origin	Malaysia

DIMENSIONS

APPLICATIONS

- Access control
- Identification
- Asset Tracking
- Secure entry systems (requiring both Mifare and UHF technologies)
