NFC ANTI METAL STICKER

PRODUCT DESCRIPTION

The Q-NFC213-M is an NFC Anti-Metal Sticker utilizing the NTAG213 technology, with a diameter of 30mm. This sticker is specifically designed for use on metal surfaces or mobile phones, providing reliable NFC functionality in environments where traditional NFC tags may struggle due to interference from metal.

PRODUCT ADVANTAGES

- **Anti-Metal Design:** Specifically designed to perform efficiently on metal surfaces, where standard NFC tags might fail.
- **Compact and Versatile:** Small diameter of 30mm makes it easy to apply on a variety of surfaces, including mobile phones.
- **Enhanced Durability:** Built to withstand regular use and environmental conditions, ensuring long-term reliability.
- **Easy Integration:** Ideal for applications such as asset tracking, secure identification, and mobile payment systems that require NFC functionality on metal surfaces.

Q-NFC213-M

TECHNICAL SPECIFICATIONS

Parameter	Specification
Model	Q-NFC213-M
Technology	NTAG213
Frequency	13.56MHz
Reading Distance	0-10cm
Write Endurance	100,000 times
Diameter	30mm
Material	Specially engineered for compatibility with metal surfaces
Warranty	Lifetime
Country of Origin	Malaysia

APPLICATIONS

- Designed for use on mobile phones or metal interfaces
