182mm x 45mm x 28mm

280kg (600lbs)

Metal

Secured Mounting

Durable Const.

Easy Installation

PRODUCT DESCRIPTION

The Q-Y280U is a U bracket designed specifically for use with 280 kg (600 lbs) electromagnetic locks. This bracket is essential for ensuring proper installation and secure mounting of magnetic locks, especially in situations where direct mounting is not possible. The U bracket provides the necessary stability and support for the lock, making it suitable for various access control applications.

PRODUCT ADVANTAGES

Secure Mounting: Provides a stable and reliable support system for electromagnetic locks, ensuring they remain securely attached to the door.

Versatile Use: Compatible with 280 kg (600 lbs) magnetic locks, making it suitable for a variety of door types and security installations.

Durable Construction: Made from high-strength metal, the bracket is built to withstand the forces exerted by the magnetic lock, ensuring long-term durability.

Easy Installation: Facilitates quick and secure attachment of magnetic locks to doors, allowing for efficient and stable setup in access control systems.
