

Q-PB1

3 Years Warranty

EMERGENCY BUTTON SWITCH KEY AUTOMATIC RESET WIRED MANUAL BUTTON FIRE ALARM

Durable Construction for Long-Term Use

The Q-PB1 is built with high-quality materials, ensuring durability and long-lasting performance. Its design can withstand frequent use without degradation, making it a reliable choice for environments that require constant readiness.

Reset Key Functionality

The built-in reset key allows for a manual system reset after the emergency button has been pressed. This ensures that the alarm can be silenced and the system restored to normal operation quickly, minimizing disruption after an incident. The reset key also prevents unauthorized resets, ensuring that only authorized personnel can manage the system.

Size: 85 x 85 x 27.3mm

Compact and slim, the Q-PB1 has a small footprint of 85 x 85 x 27.3mm, making it perfect for installations in areas with limited space. The small size does not compromise its functionality, ensuring that it fits discreetly on walls while remaining easily accessible in case of an emergency.

PRODUCT DESCRIPTION

The Q-PB1 Emergency Button Switch is designed for reliable and quick response in emergency situations. With a one-key alarm function, it provides a simple and effective way to trigger an alarm or signal for help. This device is ideal for use in various safety and security applications such as hospitals, schools, industrial areas, and commercial buildings.

PRODUCT ADVANTAGES

Efficient Emergency Response: The one-key alarm function ensures immediate activation during critical moments, facilitating fast response.

Versatile Installation: Compact size and universal design make it suitable for various environments, from public spaces to private facilities.

Q-PB1

3 Years Warranty

TECHNICAL SPECIFICATION

Easy Reset Capability: Comes with a reset key for easy system reset after each use, preventing false alarms and ensuring continuous operation.

Durable and Safe: Rated for 250V DC with 300mA current, providing stable performance for long-term use.

Flexible Wiring Options: Supports NC and NO configurations, offering flexibility to integrate into existing security or emergency systems.

This description highlights the product's technical specifications and key advantages in a clear, concise manner.

TECHNICAL SPECIFICATION

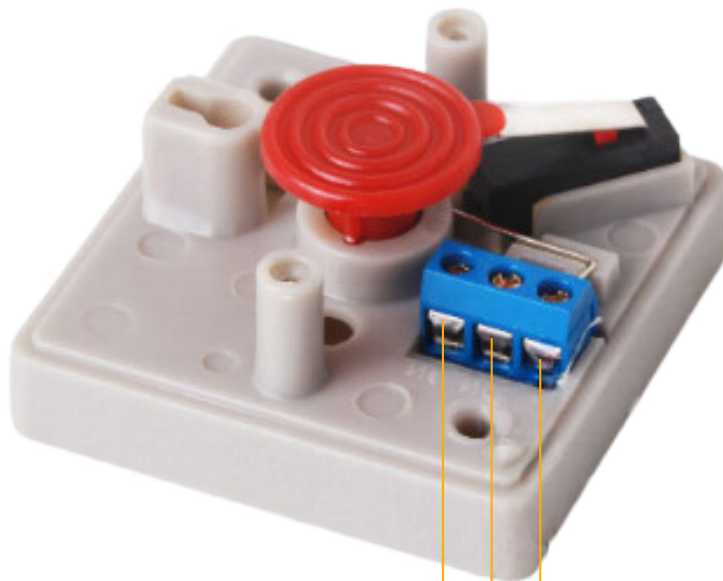

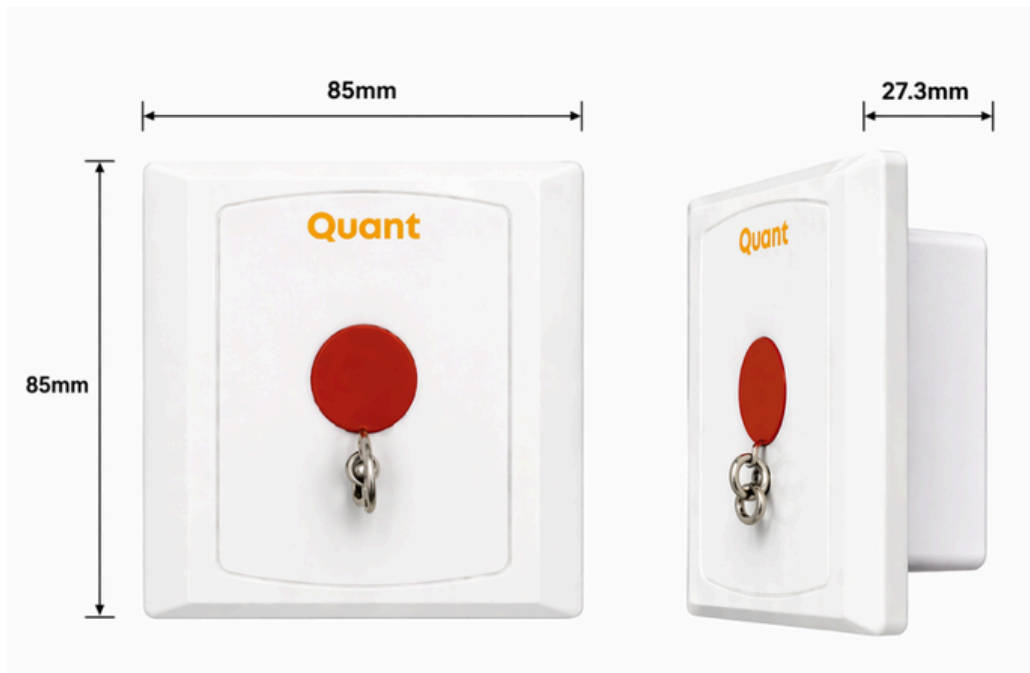

Product Parameter	Description Parameter
Model	Q-PB1
Rated voltage	250VDC
Rated current	300mA
Contact	COM, NC, NO
Size	85×85×27.3mm
Case Material	ABS
Switch Mode	Reset By Key
Load Current	1.25A
Warranty	3 Years
Certifications	CE
Country of Origin	Malaysia
